Projects

Quizzical:

- An interactive quiz app that delivers five multiple-choice questions per round using the Open Trivia Database API. Integrates with Open Trivia Database API to fetch and display randomized questions. Provides instant feedback on answers with clear visual cues.

Mediplus:

- Developed a responsive website focused on providing medical information and services. Utilizes HTML, CSS, and SCSS for a polished and user-friendly interface. Enhanced functionality with JavaScript for dynamic user interactions.

Space tourism:

- Developed a space tourism website that dynamically displays information by fetching data from a JSON file. Utilizes JavaScript to load and present space tourism data from JSON. Designed with HTML and CSS for a modern and appealing user experience.
